NuCana plc to Participate in the Evercore ISI Biopharma Catalyst / Deep Dive Conference

Edinburgh, United Kingdom, November 20, 2017 (GLOBE NEWSWIRE) – NuCana plc (Nasdaq: NCNA), a clinical-stage biopharmaceutical company focused on significantly improving treatment outcomes for cancer patients by applying its ProTide™ technology to transform some of the most widely prescribed chemotherapy agents into more effective and safer medicines, announced today that Hugh S. Griffith, Chief Executive Officer and Don Munoz, Chief Financial Officer, will host one-on-one meetings at the Evercore ISI Biopharma Catalyst / Deep Dive Conference at the Boston Harbor Hotel in Boston, MA.

Event: Evercore ISI Biopharma Catalyst / Deep Dive Conference

Date: Wednesday, November 29, 2017 and Thursday, November 30, 2017 Location: Boston Harbor Hotel, Boston, MA

About NuCana

NuCana[®] is a clinical-stage biopharmaceutical company focused on significantly improving treatment outcomes for cancer patients by applying our ProTide technology to transform some of the most widely prescribed chemotherapy agents, nucleoside analogs, into more effective and safer medicines. While these conventional agents remain part of the standard of care for the treatment of many solid tumours, their efficacy is limited by cancer cell resistance mechanisms and they are often poorly tolerated. Utilising our proprietary technology, we are developing new medicines, ProTides, designed to overcome key cancer resistance mechanisms and generate much higher concentrations of anti-cancer metabolites in cancer cells.

Our most advanced ProTide candidates, Acelarin[®] and NUC-3373, are new chemical entities derived from the nucleoside analogs gemcitabine and 5-fluorouracil, respectively, two widely used chemotherapy agents. Acelarin is currently being evaluated in three clinical studies for patients with ovarian cancer, biliary cancer or pancreatic cancer. NUC-3373 is currently in a Phase I study for the potential treatment of a wide range of advanced solid tumours.
